

Motorola Droid Mini Battery Replacement

This guide will show you how to replace the battery in your Motorola Droid Mini.

Written By: Arielle

INTRODUCTION

The battery is responsible for most of your phone's functions. When the battery malfunctions, the phone may not function properly, and needs to be replaced.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
 - [Tweezers](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Back Case

- Pull out the volume keys using the plastic opening tool.

Step 2

- Use the plastic opening tool to gently pry off the back case. Make sure to go around the entire perimeter of the case.

Step 3 — Battery

- Use the T5 screw head to unscrew the 9 silver screws from the housing frame.
- Carefully separate the housing frame from the motherboard.

Step 4

- Carefully use the tweezers to separate the motherboard from the screen.

Step 5

 Carefully peel back the orange adhesive from the battery. Make sure to remove all the adhesive attaching the battery to the motherboard.

- Use the black triangular tab to pull battery completely off the motherboard.

To reassemble your device, follow these instructions in reverse order.
